Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-9, the prior art fails to teach or suggest a system for reformatting data in an integrated circuit voice processor comprising "a direct memory access (DMA) controller adapted to transfer data stored in memory buffers within the first linked list of sequential data structures into memory buffers within the second linked list of sequential data structures by traversing the first and second pointers in the first linked list to identify the source location of the data and traversing the third and fourth pointers in the second linked list to identify destination," in combination with other limitations, as specified in the independent claim 1.

Regarding claims 10-16, the prior art fails to teach or suggest a method for reformatting data in an integrated circuit voice processor comprising "transferring data stored in memory buffer within the first linked list of sequential data structures into memory buffers within the second link list of sequential data structures by traversing the first and second pointers in the first linked list to identify the source location of the data and traversing the third and fourth pointers in the second linked list to identify the destination," in combination with other limitations, as specified in the independent claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
